The floating fly line with a clear advantage

MONIC® Floating Fly Line for Tropical Fly Fishing

In developing MONIC® fly lines, our goal was to provide the fly fisherman with a better option for critical situations. The clear MONIC fly line is nearly invisible in the water, eliminating shadows and reducing spooking. Both the clear and opaque MONIC lines will enhance your ability to make long, accurate casts.

Specifications

The MONIC fly line's tropical classification restricts its use to air and water temperatures above 60°F. Below this temperature, reel memory and line stiffness are evident.

Selecting Clear vs. Opaque MONIC Fly Line

Your selection of clear versus opaque MONIC line will depend a great deal on personal preference. The clear line is more forgiving when casting to fish that are easily spooked. The clear line will eliminate shadows and reduce spooking when, for example, you accidentally line a school of bonefish, or when casting to wary tarpon or permit.

The clear MONIC fly line virtually disappears in water, sometimes making it difficult to readily determine fly location. One way to minimize this effect is to reduce leader length from normal, by 50 percent or more. Shorter leaders will also help turn over wind-resistant flies.

Splicing MONIC Fly Line

For splicing leader and backing on line sizes 6 through 10, a conventional nail knot over the fly line is recommended. See Figure 1.

Figure 1. Conventional nail knot

For line sizes 11 and 12, use a loop construction: Fold the line on itself and secure the loop with two or three nail knots using 15 lb. monofilament nylon. See Figure 2.

Figure 2. Loop construction

Alternatively, use braided leader loop connectors, such as those supplied by your local tackle dealer.

MONIC Fly Line Breaking Strength

Line Size	Breaking Strength*
6	17 lb.
7	24 lb.
8	24 lb.
9	24 lb.
10	24 lb.
11	30 lb.
12	30 lb.

** Tests made using Dillon Universal Tester*

Limited Warranty

Your MONIC fly line warranty covers factory defects for one (1) year from the date of original purchase. This warranty does not cover damage caused by misuse of the product.
